SPINDLE REBUILD EXPANSION

Epic's spindle rebuild growth has triggered another expansion of over 600 square feet for rebuild space and the addition of a supervisor's office. The addition allows for a more organized and natural flow of work, with breakdown and cleaning completely separated from the machining and rebuild area.

The purchase of an ultrasonic machine for cleaning spindle parts has further helped to improve efficiency by reducing some of the hard labor and harsh chemicals. Utilizing safe cleaning solutions is an environmental improvement.
